

**Heavy Duty Silent Chain Conveyor**

**Bleichert Standard**

**Description**

- High capacity, accumulating chain conveyor used for the transport of heavier pallets and parts.
- Ideal for harsh environments where durability is the primary objective.
- Alloy steel chain provides optimal toughness and wear characteristics.
- Less vibration and noise than other types of chain.
- Engineered to handle weights of up to 5000kg or more depending on the application.
- Variable conveyor widths up to 5000mm or more depending on the application.
- Unlimited conveyor lengths depending on the application and number of stations.
- Heavy duty welded construction with structural tube chain rails
- Variable speeds up to 60 fpm.
- Conveyor can be loaded/unloaded manually or via robot.
- Each conveyor section consists of two steel side profiles with integrated steel side guides, chain supports, drive chain, and drive motor.
- Available accessory devices such as part present switches, pallet stops, lift and/or locate units, elevators, transfers, and rotate units.
