

Bleichert Robot Cells

Bleichert Standard

Description

- Bleichert provides a variety of solutions for robotic applications.
- Robots are ideal for the most demanding and complex production requirements.
- Capabilities include robot setup and application configuration.
- Competencies include robot programming, vision systems, software engineering, and full system debug.
- Bleichert partners with many robot manufactures to provide fully integrated assembly solutions.
- Ability to integrate Bleichert standard conveyors into the system for reduced costs.
- The work range of the robot can be adapted to the cell configuration.
- Flexible systems to utilize multiple parts in the process.
- Variety of safety measures including light screens and safety mats.
- Available accessory devices such as robot gripper units, conveyors, and storage racks.

Pack-in/Pack-out Cell with Conveyor

Robot Cell with Engine Blocks
